PROFESSIONAL SUMMARY

Forward-deployed technical strategist with **5+ years** of experience translating enterprise requirements into **AI workflows, API integrations**, implementation architectures, and scalable customer-facing solutions. Experienced in technical discovery, requirements engineering, process and data mapping, solution design, API troubleshooting, pilots, testing, UAT, go-live, and post-implementation optimisation across SaaS, CRM, commerce, messaging, analytics, and MarTech ecosystems. Bridges customers, Product, Engineering, Sales, and CS to move ambiguous problems from discovery to production with **measurable business impact**.

EXPERIENCE (5+ YEARS)

Head of Customer Success | QuickReply.ai

Mar 2023 - Present

Forward-Deployed Solutions, Enterprise Integrations and AI Workflows

- Acted as a **forward-deployed bridge** between enterprise customers, Product, Engineering, Sales, and CS, converting ambiguous needs into **functional specifications**, solution flows, **integration architectures**, pilots, and implementation plans.
- Owned delivery** from discovery and feasibility validation through dependency and data mapping, **testing, UAT, go-live readiness**, enablement, and post-launch optimisation.
- Designed enterprise workflows** across CRM, commerce, messaging, marketing automation, analytics, support, payments, logistics, and ERP-adjacent systems using **APIs, webhooks, events**, and automation platforms.
- Created a **pilot-to-production integration framework** that generated **\$50K+ MRR** in identified opportunities by validating value, feasibility, dependencies, repeatability, and implementation effort.
- Built intelligence and health systems for **900+ accounts** using adoption, usage, SLA, engagement, sentiment, and commercial-risk signals, contributing to **gross revenue churn below 2%**.
- Improved efficiency by **40%**, reduced service-delivery latency by **25%**, lowered reporting errors by **20%**, and trained **12+ team members** on APIs, integrations, troubleshooting, and workflow diagnosis.

Technical Business Analyst | QuickReply.ai

Jun 2022 - Mar 2023

API Troubleshooting, Workflow Simulation and Implementation Support

- Gathered **business, functional, and technical requirements**; created process flows, use cases, **user stories, acceptance criteria**, source-to-target mappings, edge cases, dependencies, and test scenarios.
- Diagnosed **REST API, Graph API, OAuth, webhook**, and integration issues through documentation review, **Postman tests**, Pipedream simulations, payload analysis, event tracing, and **root-cause analysis**.
- Converted Shopify, Meta, WhatsApp, CRM, checkout, analytics, and MarTech requirements into **executable workflows** and precise **Product or Engineering escalation artifacts**.
- Supported **integration testing, UAT**, technical onboarding, **production rollout**, and **post-launch troubleshooting** while documenting assumptions, failure conditions, fallbacks, and ownership.

Business Analyst | QuickReply.ai

Jun 2021 - Jun 2022

Customer Requirements, SaaS Implementation and Workflow Design

- Mapped **current-state and future-state processes** into WhatsApp marketing, campaign automation, commerce, support, and **customer-engagement workflows**.
- Created **implementation playbooks**, onboarding documentation, workflow guides, **technical handovers**, and test scenarios to improve consistency and **time-to-value**.
- Coordinated **cross-functional delivery** from discovery through **configuration, validation, rollout**, and early adoption; converted recurring failures into **product, automation, and documentation improvements**.

EDUCATION AND CERTIFICATIONS

EDUCATION

School of Engineering and Technology, Srinagar Uttarakhand
Bachelor of Technology, Computer Science and Engineering
2018 - 2022

St. Joseph's Convent School
Intermediate, Mathematics and Computer Science
2017 - 2018

CERTIFICATIONS

- Meta Certified** Business Messaging Strategy
- Meta Certified** WhatsApp for Business Technical Implementation

Utkarsh Kala

Forward Deployed Engineer | Solutions Architect

Implementation Engineer | Integration Engineer | Technical Business Analyst

SELECTED TECHNICAL PROJECTS

Multi-Agent Product Recommendation Workflow

AI Architecture, RAG and Output Optimisation

Separated planning, knowledge retrieval, and response formatting into **specialised agents**. Refined prompts, RAG structure, agent handoffs, and evaluation logic to **reduce hallucinations** and **improve eCommerce recommendation consistency**.

Customer Intelligence and Health System

Risk Scoring, Retention and Portfolio Prioritisation

Unified adoption, usage, SLA performance, stakeholder engagement, sentiment, and commercial risk. Built **early-warning triggers**, escalation workflows, and recovery playbooks for **900+ accounts**, contributing to **gross churn below 2%**.

Enterprise Integration Expansion Framework

Discovery-to-Production Integration Delivery

Created a **repeatable method** to evaluate customer integrations across value, feasibility, dependencies, effort, and scalability. Moved qualified use cases through **simulation, pilot validation**, implementation planning, and production recommendation, identifying **\$50K+ MRR opportunities**.

In-House CRM and Automation Systems

Operational Visibility, Onboarding and Support Automation

Built workflows for **account visibility**, health indexing, risk tracking, assignment, onboarding, follow-up scheduling, **SLA monitoring**, CSAT, self-service documentation, and tier-based growth or retention playbooks, helping **improve team efficiency by 40%**.

CORE CAPABILITIES

Business Analysis

Requirements engineering, stakeholder discovery, process mapping, user stories, acceptance criteria, gap analysis, data mapping, test scenarios, and UAT.

Implementation Engineering

Discovery, planning, configuration, dependency management, testing, UAT, go-live, hypercare, technical onboarding, and enablement.

AI and Automation

Generative AI, RAG, prompt engineering, AI agents, multi-agent orchestration, workflow automation, knowledge-base optimisation, and output evaluation.

Solution Architecture

Solution and integration architecture, data flows, non-functional requirements, scalability, security, error handling, fallback logic, and production readiness.

Integration Engineering

REST and Graph APIs, OAuth, webhooks, JSON, authentication, payload analysis, field mapping, event tracing, and event-driven workflows.

Technical Delivery

Technical consulting, stakeholder management, root-cause analysis, documentation, product feedback, risk management, and cross-functional execution.

TECHNOLOGY STACK

APIS & CLOUD

REST APIs, Graph APIs, Shopify Graph API, Instagram Graph DM API, Meta Cloud API, WhatsApp Business Platform API, OAuth, Webhooks, JSON, Postman, Pipedream, AWS Lambda, EventBridge, MongoDB, and serverless workflows.

CRM, COMMERCE & MARTECH

Shopify, WooCommerce, Magento, Recharge, HubSpot, Salesforce, Zoho CRM, Zoho Desk, Zoho Analytics, LeadSquared, Freshworks, Freshdesk, Gorgias, MoEngage, Airtable, and Zapier.

AI & DEVELOPMENT TOOLS

OpenAI, Claude, Gemini, Cursor, Windsurf, Lovable, Bolt, RAG, prompt engineering, AI agents, multi-agent orchestration, Google Apps Script, Terraform concepts, AWS, Azure, and GCP.

DELIVERY LIFECYCLE

Discovery > Requirements > Architecture > Pilot > Integration > Testing / UAT > Go-Live > Hypercare > Optimisation

ARCHITECTURE AND DELIVERY ARTIFACTS

REQUIREMENTS & DESIGN

Functional and technical requirements, current-state and future-state process maps, user stories, acceptance criteria, solution flows, and data mappings.

INTEGRATION & VALIDATION

API and event specifications, field mappings, payload analysis, Postman collections, workflow simulations, test cases, UAT criteria, and defect reproduction.

LAUNCH & OPERATIONS

Implementation plans, dependency trackers, go-live readiness, handovers, hypercare, SLA monitoring, risk triggers, and optimisation roadmaps.
